SUMMARY

Full-stack software engineer with 6+ years of experience building and maintaining scalable web applications using Java, React, and AWS. Skilled in designing robust APIs, optimizing performance, and delivering production-ready features in agile environments. Strong foundation in both frontend and backend technologies, with a focus on clean code, cloud-native development, and automation.

SKILLS

Programming Languages	: Java, TypeScript, JavaScript, Python
Frameworks	: React, Tailwind CSS, Bootstrap, Streamlit, Vite, Cypress, Jest, Spring Boot, Hibernate, JPA
Database	: Oracle, DynamoDB, MySQL, MongoDB, Redis
Cloud	: AWS (Lambda, SNS, SQS, DynamoDB, S3, Step Functions, EC2, Parameter Store)
Others	: Git, Github, BitBucket, Jenkins, Splunk, Agile (Scrum), Metabase, Restful APIs (JSON)

WORK EXPERIENCE

Software Developer II, Gallup Inc, United States

Mar 2023 - Present

- Delivered a scalable system processing over 1M daily clickstream events, powering a real-time events dashboard with improved uptime. Designed a GraphQL API that reduced query response time by 30%, enabling 50+ custom visualizations.
- Implemented an infinite table using AG Grid, enabling the handling of over 100,000 rows and preventing screen rendering issues.
- Resolved critical production issues by conducting root cause analysis with Splunk and implementing durable fixes; built a Streamlit app to streamline diagnose and rerun failed processes, reducing incident resolution time by 20%.
- Integrated the Vitest testing framework into the React application, establishing a comprehensive test suite that achieved 80% code coverage and significantly boosted application reliability.
- Created python and typescript scripts to automate documenting 1000+ events saving 20+ manual work hours.

Senior Software Engineer, Mindtree, India

May 2018 - Aug 2022

- Led a team of 4 engineers for 2 quarters, driving project delivery, mentoring junior developers, and ensuring alignment with technical and business goals.
- Modernized and maintained a bookkeeping application for a stock market registry client using Java, Spring, and JSP, ensuring reliable handling of 500K+ financial transactions.
- Developed mobile application in collaboration with Mindtree Innovation Hub to automate the onboarding process for new employees, eliminating manual coordination and reducing employee workload; showcased at Mindtree's annual innovation summit 2018.

PROJECTS

Diabetes Prediction Web App

- Developed a web application that analyses medical parameters of patient to predict their diabetes risk.
- Implemented a React frontend and Flask backend running a neural network model for prediction with 82% accuracy.

Campus Core:

- Built a scalable microservices-based system using Spring Boot and React, containerized with Docker, achieving 50% faster data retrieval and 99.9% uptime for 1,000+ student records.
- Developed cross-origin REST APIs integrated with MySQL and JPA, and connected them to reactive React components, achieving sub-100ms response times and reducing system coupling by 60%.

EDUCATION

The University of Suny Buffalo, USA - Master's in Computer Science

Aug 2021 - Jul 2023

Nitte Meenakshi Institute of Technology, India - Bachelor's in Computer Science

Aug 2014 - Apr 2018
